Safety First

For eight decades, GLORIA has been the right point of contact for all matters relating to preventive fire protection. During this time, GLORIA has been able to gain a wealth of experience, optimise our products and adapt them to current requirements.

Their focus are fire extinguishers, of which we offer a wide range of portable and mobile models.

Another main focus is on smoke and CO detectors from their own production. These are highly reliable and come with manufacturer's warranties of up to 10 years. With a sophisticated range of accessories and spare parts, they create the safety you need.

The portfolio is rounded off by both internal and external training courses and seminars. Especially with the VR Fire Trainer, they are breaking new ground and setting the course for a new type of fire extinguishing training in the virtual world.
